January 2007

Welcome to the first edition of the Strand Hardware newsletter which will become a regular feature aimed at keeping all our customers informed of new product developments and innovations.

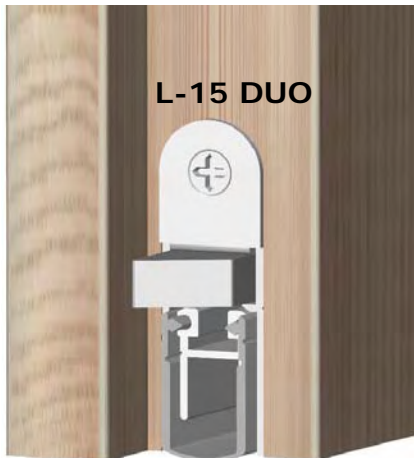

2006 was a particularly busy year for Strand which saw the introduction of many new products. We hope to feature more of them in the next issue.

We trust that you will find the NEWSTRAND interesting and informative. Please let us know!

Any comments or ideas you have concerning any of our products or services can be emailed to us at:
info@strandhardware.co.uk

Craig Fox
Sales Director

UPDATE Are you aware of the changes to "Approved Document E" introduced during July 2003 covering the acoustic performance of door assemblies? If you want to know more about this and how it affects you? - Call 01922 639111

NEW RANGE OF SCREWJACK WINDOW OPENERS AND POLE WINDERS

Through continual product development and more importantly listening to customer's requirements we have introduced a new and extensive range of competitively priced screwjack openers. The single screwjack is available in three sizes - 6" 8" and 12" Telescopic screwjacks are available in two sizes - 10" and 12" All the screwjacks are available from stock in polished brass or chrome plated. The range is complimented with a choice of pole winders in polished brass or chrome plated. There are two types to chose from, the standard economy version and the deluxe mahogany winder available in three popular lengths. Call 01922 639111 now for more details

NEW ATHMER CATALOGUE

Strand are pleased to announce the launch of its new catalogue for the Athmer range of Door Seals. It includes the addition of the new L-15 automatic door seal which has been successfully tested to an astonishing 50dB rating on acoustic doors and is also suitable for fire and smoke door assemblies.

It is available in both single and double actuation versions in a variety of sizes which can be cut to size and also offers an optional integral flush bolt solution for double doors. We have also included the FS500 acoustic frame seal which we will be introducing very soon. The FS500 will enhance the acoustic performance of the door when used in conjunction with one of the acoustic drop seals. It has also been designed to be quick and easy to install to new and existing door assemblies without the need to remove the door from the frame.

EMPLOYEE FEATURE

Name: Mark Essex
Job Title: Technical Sales Advisor
How many years in the Trade: 22
Likes: Music, Reading and Hiking
Dislikes: Jade Goody

Congratulations to Mark who is seen here being presented with the Bronze Award for 1st year students at the Guild's Annual Luncheon held at The Royal Garden Hotel, London recently.

A big hit for the NEW website

As some of you may be aware last year we introduced our long awaited new web site which has been a huge success not only with our customers, but specifiers and architects alike. They particularly like its ease of use and also the fact that all the product catalogues can now be viewed online or easily downloaded as pdfs.
