February 2010

Welcome to the 2010 winter edition of Newstrand. Firstly we would like to start by saying a big thank you to everyone who attended or supported our biannual charity golf day in July of last year. Once again this was a tremendous success and managed to raise an astonishing £8000 for the oncology unit at Birmingham Children's Hospital, which in today's economic climate is fantastic. The setting this year was at Walsall Golf Club which was a fabulous oasis of calm in an urban environment. A big thanks to it's staff for their help in organising the event. As you can see Russell and I presented the £8000 cheque to Bruce Morland at the BCH and this will go towards funding one of the many research programmes into childhood cancers. I am sure you will agree if it helps just one child, it will have been worthwhile. Our thanks also go to Bruce Morland for attending the golf dinner and talking to everyone about the tremendous work the oncology team at Birmingham Children's Hospital do.

For further information on any of the products featured you can phone us on 01922 639111, fax: 01922 626025 or e-mail: info@strandhardware.co.uk

NEW PRODUCTS

To further complement our already extensive range of automatic door seals we are pleased to announce the introduction of two new innovative products, the new surface mounted Applic A and the L-15 Quickfix.

The Applic A being surface mounted on the door face can be quickly installed without any special fixings or preparation, so is ideal for both the retrofit market or new doors and with its modern slimline design doesn't compromise the overall aesthetics of the door. Seals gaps between 5 - 11mm maximum. Finishes available: White powder coated, silver and dark bronze anodised cover

With the installer in mind the popular L15/30 50dB series is now available with a 'quickfix' fitting method and seals gaps up to 14mm. This ingenious device comprises of a concealed spring loaded clip that securely holds the seal into the pre-routed groove at the bottom of the door without the need for screws. This will save considerable time and money on larger projects as fixing only takes a few seconds. The seals can be ordered to the exact door size from the factory for even quicker fixing.

With these latest editions Strand can offer one of the most comprehensive ranges of Automatic door seals in the market place today.
